

Fall 2020 Training Newsletter

September Webinar - Tuesday, September 22, 2020, 2:00 pm ET

The Safety of Drinking Water Using ISO/IEC 17025 Accredited Testing and Sampling

Marlene Moore of Advanced Systems, Inc., will provide an overview how ISO/IEC 17025 accreditation of testing and sampling activities provides assurance that the laboratory is competent, and the data and information reported is objective, impartial, and without undue client or management pressure. [Read more](#)

Don't Miss our Featured Presentation - Only Few Spots Remain "Enhancing Forensic Decision Making"

This five-hour live training course that focuses on knowledge and practical skills regarding how to recognize and minimize potential bias for better forensic decision making. [Read more](#)

Laboratory-Related Training

The new and improved [Understanding Measurement Uncertainty](#) course replaces the previous Fundamentals of Measurement Uncertainty and is designed to better provide practical approach to the estimation of measurement uncertainty, as well as traceability and measurement confidence. Join us for our next session in October.

The new [Lead Assessor Intensive Training](#) has been a great success, having sold out in its initial offering. This course provides hands-on learning in the required competencies for assessor, with participants providing feedback such as, "It was the best course I ever had for quality. It is like a manual for being an assessor."

Forensic-Related Training

July and August [Forensic Technical Assessor](#) sessions have sold out. To meet the demand, we are running monthly sessions till the end of the year. With both the October and November sessions already subscribed at more than half capacity, we recommend registering as soon as possible to secure your spot.

We added a second session in September of [Forensic Internal Auditor Training](#) because the first session sold out before the deadline. With only one more session scheduled in November, we recommend you take this opportunity and register for the September session. Registration will be open till the day before first day of the session.

Certification-Related Training

Our fall classes are filling up fast and we only have a few sessions left this year.

[ISO/IEC 17021-1](#) October 19-21, 2020

[Making IAF MDs Work for You](#) October 22-23, 2020

[ISO/IEC 17024](#) November 18-19, 2020

[ISO/IEC 17065](#) September 23-24 and December 8-9, 2020

[ANSI/ASTM E2659](#) November 4-6, 2020

2021 Dates Have Been Announced

No time to join a scheduled class? ANAB offers a number of self-paced training courses that you can complete at your own pace on your own time.
